Root-finding for Sample2: bracket $[a, b]$ and root $\hat{\lambda}$
$g(\lambda) = \lambda/(1 - e^{-\lambda}) - N/U$
$b = N/U = 1.718$
$g(b) \approx 0.376 > 0$
$\hat{\lambda} \approx 1.201$
$a \to 0^+$
$g(a) \approx 1 - N/U = -0.718$
